

# Telephone Security

For your personal telephone safety, please be aware of the following options. Information is also located in the front of the Telus telephone book under Privacy Issues.

## **Per Call Blocking**

On a per call basis, you can stop your name and number from being displayed. Dial \*67 before the number and "Private" will be displayed instead of your name and number. Free Service.

## **Call Return**

Provides the number of the last person who called your line, when you dial \*69. Please be aware you will be charged for this service.

## **Call Display**

Shows both the caller's name and number so you can see who called while you were out. This service requires compatible display unit or telephone.

## **Obscene or Harassing Calls**

**Anonymous Called ID** - Together with Call Display, this service identifies the name OR spoken name if most incoming calls including those with the number marked "private" or "unknown".

There are other telephone safety methods such as **Call Screen and Call Trace** which allow you to trace and record the information for legal purposes. Please review the guidelines in the phone book for further information.
